**Car Door Hinge Profile Steel** 

### **About Us**

Anyang Rarlong Machinery Co., Ltd. is located in Anyang City, Henan Province, China, is a member of Hongyuan section steel group. Our group company was founded in 1996, is a producer of profile steel and steel products. Rarlong is specialized in manufacturing various types of hot rolled profile steel, cold drawn steel, some of the profiles are further processed to wheel rims, rail fasteners and bailey bridge panel, Halen channel etc.

Profile steel experienced development team works hand in hand with out dynamic sales department and technical testing teams to ensure an outstanding profile steel development and delivery on time. Every year, more than 100 special customized profile steels are developed to suit our clients' needs. Now we have 5 rolling mills which can produce section steel width from 6mm to 250mm and annual profile steel output is 200,000 tons.

With more than 20 years of development, our group has four sub-factories, two factories in Anyang for producing profile steel, bailey bridge, rail fasteners and halfen channel; two factories in Jiaxing and Jiaozuo for producing off-road steel wheel. Now we have one provincial technical center with various testing equipments that can do physical and chemical checking. We are also ISO9001/TS16949, ISO14001 and ISO18000 certified company.

Now we can develop and produce various types of automobile door hinge steel, short development cycle, good after-sales service, for the auto parts manufacturers to save production costs and improve work efficiency.
